SuperGlide

## ImagePerfect™ 2578PA 2D Wrap SuperGlide

**ImagePerfect™ 2578PA 2D Wrap SuperGlide** is a high-performance, super soft 2 mil calendered vinyl designed to deliver high-quality images. IP2578PA works with wide-format digital printers that use eco-solvent, solvent, UV-cured and latex inks. Ideally suited to compound curves and moderate recesses (2D, single-step) it can be applied to a wide variety of substrates, including glass, polystyrene, PVC and plastics such as ABS.

### Low initial tack, minimal friction

The new SuperGlide permanent adhesive technology creates supremely low initial tack and minimal surface friction, so that a single person can easily apply and reposition graphics even on wrapping jobs that normally require two people. An optimized liner material does not generate static charges on the film's surface when released, further aiding application and adhesion.

ImagePerfect 2578PA 2D Wrap SuperGlide also incorporates PerfectApply technology for bubble-free application and increased repositionability.

### Features

- Up to 8 year durability
- 2 mil film
- PerfectApply technology for bubble free application
- Liner releases without static
- Excellent slideability and removability

### Benefits

- High dimensional stability
- Removes easily if necessary
- High Opacity prevents show through
- PerfectApply technology allows for bubble free application and increased repositionability

### Compatible Laminates

- IP 2810-105: IP2810-105 GLOSS 54x54  
IP2810-105 GLOSS 63x54  
IP2810-105 GLOSS 54X25M

### Whatever the Application - Think ImagePerfect™

Dimensions	Part Number	Product
54 in x 54 yd	IP2578PA 2D SUPERGLIDE 54X54	IP 2578PA
54 in x 25 Meter	IP2578PA 2D SUPERGLIDE 54X25M	IP 2578PA
63 in x 54 yd	IP2578PA 2D SUPERGLIDE 63X54	IP 2578PA
