

## ImagePerfect™ iD7 WindowEtch/ ImagePerfect™ iD7 Window Etch *Air* High-Performance Etched Glass Film

ImagePerfect™ iD7 WindowEtch is designed for long-term decoration on windows. The solvent-based adhesive, numerous finish options, and favorable price point make it the ideal choice when looking for a long term decorative window solution. The finish options include Satin Crystal, Satin Crystal HD (High Density), Silver Frost, and Light Silver Frost. Please refer to the product brochure for viewable finishes. Each finish is available with or without PerfectApply adhesive.

ImagePerfect™ iD7 WindowEtch features a solvent-based adhesive so can be wet applied if desired, without any milkiness or change of color. This film can be printed if done with care and requires no lamination. It should be applied at temperatures greater than +40°F.

Attention: Air-release products should not be wet-applied.

Specifications
